

# LIGHT MANAGEMENT CAN BE SO EASY!

## NOW TWICE AS NICE!

OUR NEW GENERATION OF DALI-2 LUMINAIRES  
FOR TUNABLE WHITE **AND** HCL APPLICATIONS.

# ONE FAMILY, TWO SYSTEMS, ALL OPTIONS

Our new generation of DALI-2 IoT<sup>1</sup> luminaires makes it easier than ever to wow your customers with modern light management solutions. The luminaire family has become more versatile, powerful and efficient, and is fit for both Tunable White and BIOLUX HCL applications. Discover the possibilities!

## Possible applications of the new DALI-2 luminaires HUMAN CENTRIC LIGHTING SYSTEM

### THE LIGHT FOR MORE WELL-BEING

- Simulation of the natural daylight curve creating a positive biological effect
- Automated control but adjustable if desired
- Energy/cost savings since less brightness required in the mornings and evenings
- Up to **30 %** additional savings with daylight/presence sensors

### RECOMMENDED CONTROLLER: DALI PRO2 IOT LDVV

- Programmed using data from a light curve based on scientific studies
- Complements DALI-2 IoT luminaires to create an HCL system for single and open-plan offices

**HCL CAN NOW ALSO BE USED WITH DAYLIGHT CONTROL**

**FIT FOR HCL AND TUNABLE WHITE**

## Possible applications of the new DALI-2 luminaires TUNABLE WHITE SYSTEM

### THE LIGHT THAT CAN BE PERSONALIZED

- Light color and brightness manually adjustable based on preferences and activity
- Choice of light colors from 2700 K to 6500 K
- Brightness adjustable from 1 – 100 %
- Greater energy savings in combination with daylight/presence sensors

### RECOMMENDED CONTROLLERS: DALI MCU TW, DALI PCU TW, DALI ECO BT, DALI ACU BT

- DALI-2 luminaires compatible with many other Tunable White capable DALI-2 controllers
- From one source at LEDVANCE or third parties
- From the LEDVANCE VALUE solution for single offices to the SUPERIOR system for installations in open-plan offices

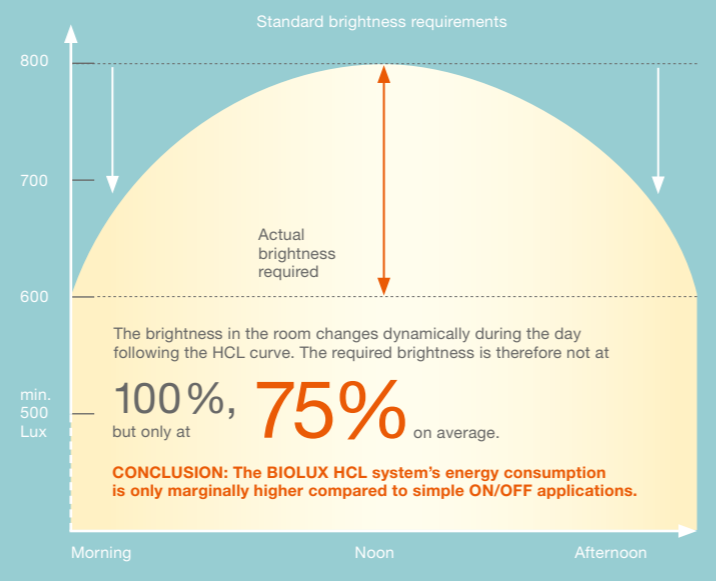

### DID YOU KNOW?

The BIOLUX HCL luminaires from LEDVANCE have a color rendering index (CRI) of at least 90. This means that illuminance can be 15 % lower compared to luminaires with CRI 80 to achieve a biological effect in everyday use. As a result, fewer luminaires are needed which saves electricity costs and supports sustainability.

The system simulates the daylight curve using the light coming from outside.

### ENERGY CONSUMPTION OF HCL APPLICATIONS

The staff room is used by different people. The light color can be adjusted manually to suit personal preferences.

From meetings to screen work, the light color in the office can be manually adjusted to suit the job.

In the teacher's room, the light color can be individually adjusted, and daylight and presence sensors provide great energy savings.

<sup>1</sup>IoT = Internet of Things. This means that the systems can provide evaluations in the form of dashboards or can be connected to cloud solutions that monitor energy consumption and maintenance cycles, for example.

## ABOUT LEDVANCE

With subsidiaries in more than 50 countries and business activities in over 140 countries, LEDVANCE is one of the world's leading companies in the field of general lighting for professional customers and end users. Emerging from OSRAM's general lighting division, LEDVANCE's portfolio includes a wide range of LED luminaires for a variety of applications, intelligent lighting products for smart homes and smart buildings, one of the most comprehensive offerings of advanced LED lamps in the lighting industry, and traditional lamps. Beyond lighting, LEDVANCE offers vertically integrated, renewable energy solutions for the building sector. Together, the lighting division and the renewable energy division form a comprehensive ecosystem for residential, commercial, and industrial buildings. For more information, visit [www.ledvance.com](http://www.ledvance.com).
